Education

National University of Singapore

Singapore

YEAR 3 STUDENT IN BACHELOR OF COMPUTING (COMPUTER SCIENCE), HONOURS

Aug 2015 - Jun 2019 (expected)

- Semester 4 CAP: 4.50 out of 5 (3.60 out of 4)
- Courses: Software Engineering on Modern Application Platforms, Introduction to Computer Security, Introduction to Artificial Intelligence, Combinatorial and Graph Algorithms

Skills

Most Experienced In Ruby, Ruby on Rails, Java, Scala, HTML, CSS, SQL
Familiar With HAML, SCSS, Javascript, jQuery, React.js, Django, Bash, C/C++, Python, R, Vim
Languages English, Bahasa Indonesia, Chinese (conversational)

Experience

Twitter Asia Pacific Pte Ltd.

Singapore

DATA SCIENCE INTERN

May 2017 - Aug 2017

- Implemented complex Scalding (MapReduce) jobs to categorize data of traffic coming to Twitter, splitting them based on various variables.
- Presented visualizations of these datasets (in Tableau) to the whole data science team as well as to marketing teams.
- Analyzed and presented data of Twitter emails, which is used to inform a product manager on traffic-driving emails.

Garena Pte Ltd.

Singapore

SERVER DEVELOPER INTERN

May 2016 - Aug 2016

- Established a data aggregation system on Garena's real-time data to reduce time and memory usage of users' queries.
- Developed an API to assist programmers in obtaining results from the data aggregation system.
- Integrated failed notifications from game APIs and established a user interface which provides programmers these notifications.

Projects

Jasmine: Chinese Learning App (<https://github.com/jasmine-team/Jasmine>)

IOS DEVELOPER

Feb 2017 - May 2017

- In a team of four, developed and launched a gamified Chinese learning application using Swift 3. This app, which was created in an iOS Development course, won 2nd prize in the course's project showcase.
- Worked on the base game engine as well as 2 minigames that are extended from the game engine.
- Applied proper software engineering principles such as Protocol-oriented programming, dependency injection, testing and continuous integration (with Travis CI), the feature branch workflow, the MVVM architecture to separate concerns.

Rubocop (<https://github.com/bbatsov/rubocop>)

OPEN SOURCE CONTRIBUTOR

Aug 2017 - Present

- Contributes "cops" (linting rules) to the popular Ruby linting "gem" (library) Rubocop.

Indonesian Online Math Contest Website (<https://github.com/donjar/kontes-terbuka>)

FULL-STACK DEVELOPER

Apr 2016 - Present

- Developed a math contest system on a Ruby on Rails-NGINX-Unicorn stack on a DigitalOcean server.
- Optimized a complex database query joining six tables, raising query times from seconds to around 200 ms.
- Designed a mobile-friendly interface with user experiences considerations.

Extracurricular Activity

NUS Hackers (<http://nushackers.org>)

NUS, Singapore

CORETEAM MEMBER

Dec 2016 - Present

- Currently hosting weekly technical talks to foster the hacker culture in NUS.
- Conducted a HTML/CSS workshop for around 100 participants.

Tutor for CS2020: Data Structures and Algorithms (Accelerated)

NUS, Singapore

NUS SCHOOL OF COMPUTING

Jan 2017 - Apr 2017

- Tutored 11 students in the span of one semester, achieving a rating of 4.4 out of 5 (department average: 4.0 out of 5) with teaching award nominations from 2 students.
- Tasks include: preparing slides and extra problems for students, discussing problems two hours weekly, grading and giving feedback to problem sets, providing consultations, and grading the coding quiz.
